- **Aoroi Battlesuit**
 - 1 Troop (160pts)
- **Eurybian Battlesuit**
 - 1 Troop (420pts)

ARMY RULE

ACCEDE LOBOMITES

At the beginning of your Manoeuvres phase, you may select a number of **LOBOMITE** formations equal to the number of **ARTICULATOR** formations you have.

Each selected **LOBOMITE** and its associated **ARTICULATOR**, which must be within 12" of each other, gain one of the following Accede Directives until the end of the round.

The **ARTICULATOR** to an Acceded formation is known as an Acceded Articulator. The **LOBOMITE** formation is known as the Acceded Lobomite.

ACCEDE DIRECTIVE: YOUR LOVE

Manipulating the minds of the Lobomites, they have nothing but love for their masters, and would die to save them.

As long as the Acceded Lobomite formation remains within 12" of its Acceded Articulator, All ranged attacks directed towards the Acceded Articulator's formation are automatically targeted towards its Acceded Lobomites instead, as if it were Escorting the Articulator.

ACCEDE DIRECTIVE: YOUR STRENGTH

The battery of the Lobomite is drained on the spot in order to overcharge our weapons, killing it.

The Acceded Lobomite formation takes a D3 Mortal Wounds and its associated Acceded Articulator gains a +1 to all Hit rolls, and have 1 added to their .

ACCEDE DIRECTIVE: YOUR STAMINA

The battery of the Lobomite is exhausted on the spot in order to boost our cybernetics.

The Acceded Lobomite formation becomes Battle-Fatigued, its Acceded Articulators formation gains 3" bonus to all troops Movement statistic.

DOCTRINE RULES

If your Army is the Skolurgy, you can use one of these Combined Regiment Doctrine rules.

EXPERIMENTAL ADAPTATION

The applied sciences of the Komet Atyka branch of the Skolurgy are rarely seen on the warfield. Although their unique and powerful modifications often make the best weapons or war.

Add 6" to the Range statistic of ranged weapons equipped by SKOLURGY troops from within your army.

ENHANCEMENTS

If your Army is using the **Experimental Adaptation** Doctrine Rule, you may use the following enchantments:

- **Integral Grenade Launcher - 15pts**

The armour of most Battlesuits can support a small load of Grenades. We shall intergrate these.

SKOLURGY BATTLESUIT only. The bearer's formation has the GRENADES tag. Additionally, each time this formation makes a Normal move, you may select one enemy formation within 6", if you do so, roll a D6: On a 4+, that enemy formation suffers 1 mortal wound.

- **Experimental Cent'Irum Genetic Package - 30pts**

Taking notes from the Rassa'Moxol, we have made steps to experiment with genetic manipulation.

SKOLURGY CHARACTER only. The bearer has 4 added to their Stamina points statistic, and has Reinforced Health 4+.

- **Neural Recalculation Staple - 25pts**

This individual has been given a Neural Staple similar to those of Lobomites, but designed to act as a Command-Structure Overlay.

SKOLURGY BATTLESUIT only. Each time you target the bearer's formation with a Manoeuvre, roll one D6: on a 4+, you gain 1MP.

BATTLESUIT troops from your army may add +1 to their Hit Rolls.

TYRANNOKTONOS PERSPICACITY

The usage of Hoplites in Skolurgý battle-tactics are often underused. With the adaptation of the Tyrannoktonos Doctrine, we can use their small size and powerful weapons to our advantage.

Each time a **HOPLITE** formation from your army makes an attack:

- If they are within 12" of target enemy formation, you may re-roll a Hit roll of 1.
- If they are outside of 12" of target enemy formation, you may re-roll a Wound roll of 1.

Additionally, all **HOPLITE** formations from your army have the Stealth Ability.

ENHANCEMENTS

If your Army is using the **Tyrannoktonos Perspicacity** Doctrine Rule, you may use the following enchantments:

- **Particle-Intergration System - 10pts**
The Ampere Fusil is a unique weapon the infantry of the Skolurgý use. Although with some extra-improvements it can go far and beyond.

SKOLURGY only. All Ampere Fusil's in the bearer's formation have their Strength statistic increased by 2, and their Swiftess, Armour Penetration, and Damage statistics increased by 1.

- **Electronic-Feedback System - 15pts**
The Arkreepage Rifle is a unique weapon the infantry of the Skolurgý use. Although with some extra-improvements it can go far and beyond.

SKOLURGY only. All Arkreepage Rifles in the bearer's formation have their Range statistic increased by 6", and their Swiftess, Armour Penetration, and Damage statistics increased by 1.

- **High-Yield Magazine Deployments - 25pts**
The standard-issue fusion magazines deployed are of standard Skolurgý B- Tier. Issuing A- Tier, may see some increased mutilation of enemy forces.

SKOLURGY only. All Ampere Carver and Ampere Carbines in the bearer's formation have their Range statistic increased by 6", and their Swiftess, Armour Penetration, and Damage statistics increased by 1.

SKEUOPHOROI HYPERETAI

Often the Exploration Fleets of the Skolurgý are known for implementing large swathes of Lobomites due to their ease of replacement. Often the remaining Lobomites are upgraded, even if barely.

At the beginning of your Manoeuvres phase, select one of the following **Hyperetai Citations** to take effect until your next Manoeuvres phase.

CITATIONS OF SKEUOPHOROI

Each time a **LOBOMITE** formation from your army is selected to brawl, if that formation made an Assault Move this round, until the end of the phase, add 1 to the Strength, and Swiftess statistics of melee weapons equipped by troops in those formations.

CITATIONS OF ANDRAPODON

At the end of the round, each **LOBOMITE** formation in your army may return 1 destroyed troop to its formation with 1 Stamina Point remaining.

CITATIONS OF CHOROS

All **LOBOMITE** formations in your army are eligible to declare an Assault move, in a turn in which it made an Advance Move.

ENHANCEMENTS

If your Army is using the **Skeuophoroi Hyperetai** Doctrine Rule, you may use the following enchantments:

- **Cognitive Dislocation - 35pts**
From afar any Articultor of the Skolurgý may use, and define the protocols for a Lobomite.

ARTICULATOR only. The bearer may Accede Lobomites from up to 24" away.

- **Molybdides Treated Bolts - 20pts**
This Articultor has been equipped in such a way where his weapons are firing experiment high-yield ammunition.

STRIKE SURVEYOR and STRIKE OPERATOR

only. Add 3 to the Swiftess statistic of the bearer's Ranged Weapons, and add 1 to the Damage statistic of the bearer's Ranged weapons.

- **Maintained Ordanance - 10pts**
A sect of Machine-Lobomites have spent day and night making sure these weapons are less-likely to detonate.

ARTICULATOR only. The bearer's formation may re-roll Hazard rolls.

MANOEUVRES

CONSUL NICIAN

Faction: SKOLURGY

Tags: VEHICLE, WALKER, FLY, ARTICULATOR, BATTLESUIT, EPIC-CHARACTER, POU, CONSUL NICIAN

Consul Nician
